

More Than an Image.
The Big Picture.

That's life in **flow.**

Enterprise Imaging Platform

At AGFA HealthCare, we understand that striking the critical balance between clinical efficiency and quality patient care starts with the physician experience.

Our Enterprise Imaging platform makes the complex simple. By converging systems into one, we reduce costs, eliminate distractions, and align seamlessly with the way clinicians work—so every provider can focus on delivering their best care.

Clinical Day in Flow — Powered by Enterprise Imaging

AGFA HealthCare's Enterprise Imaging platform keeps work moving seamlessly across specialties, sites, and systems. Now your clinicians can access imaging workflows from virtually anywhere, collaborate freely, and diagnose with greater confidence than ever before.

7:00 AM

One Patient, One Imaging Record

From home, clinicians see every image and prior across specialties in a single, connected record. No toggling. No gaps. Just confidence in every clinical decision.

9:30 AM

Smarter Workflows, Smarter Decisions

At the hospital, a neuro-radiologist receives a personalized, dynamically prioritized worklist. AI flags a suspected large vessel occlusion, moving the study to the top of the queue and helping expedite critical care.

Noon

Collaboration Without Boundaries

A virtual tumor board reviews radiology, pathology, and surgical images in one shared workspace. Real-time access enables faster, more coordinated decisions.

3:00 PM

Enterprise-Grade Access, Anywhere

A primary care physician requests an ortho consult. The surgeon opens diagnostic quality* images and surgical planning tools quickly, right from the EMR through the XERO® Universal Viewer. No transfers. No rework.

5:30 PM

AI That Amplifies, Not Interrupts

As shifts wind down, AI works in the background—surfacing findings, calculating measurements, and supporting enhanced care directly within physicians' workflows. Physicians stay focused and supported, not overburdened.

Milestones on Your IT Journey – Powered by Enterprise Imaging

Seamless integration, effortless scaling, and cloud adoption—on your terms. AGFA HealthCare's Enterprise Imaging platform lets IT run smoothly across networks, vendors, and partners, freeing your team to focus on transformation, not maintenance.

AUGUST

Seamless Expansion

Grow with confidence. With Enterprise Imaging's modular platform, new care settings connect seamlessly, keeping workflows familiar and care uninterrupted.

DECEMBER

Scaling Made Simple

As your organization grows, the platform scales with ease, delivering consistent performance.

JANUARY

Stronger Partnerships

Connect new reading partners or vendors seamlessly. Our open ecosystem keeps your workflows smooth, and your team focused on care.

MAY

Cloud on Your Terms

Whether starting with Storage, VNA, or full diagnostic imaging, our delivery models adapt to your strategy—hybrid or full cloud, on your terms.

JULY

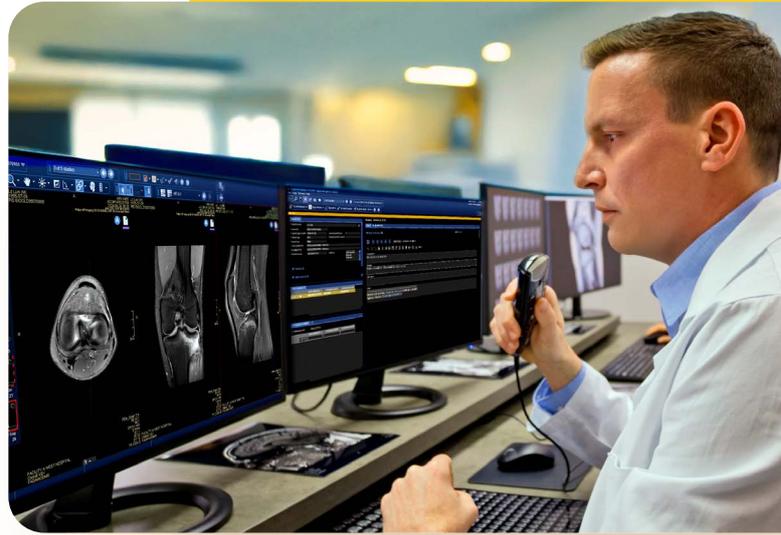

Focus on Transformation

As you shift to the cloud, our managed services handle the infrastructure, freeing your IT team to advance clinical innovation and strategic priorities.

* Actual image quality may vary depending on monitor specifications and archived resolution.

One Platform. Converged. Modular. Built for the Enterprise.

AGFA HealthCare's Enterprise Imaging platform is the foundation of your Imaging Health Network™. A single, intelligent ecosystem that unites imaging across specialties, care settings, and systems.

- **Modular by design**, the platform grows with you. Start with a single service line and expand across departments, sites, and specialties while maintaining a consistent user experience and backend architecture.
- **XERO® Universal Viewer**, named Best in KLAS 2025, powered by AGFA's Streaming technology, provides care teams full-fidelity access to images quickly, on any compatible device, without downloads or plug-ins—keeping clinicians connected wherever they are.
- **Streaming Client** delivers effortless access beyond the limits of traditional reading rooms. By unifying the entire care team in a single, seamless environment, it empowers smarter collaboration and enhanced delivery of patient care, powered by AGFA's Streaming technology.
- **Our Vendor Neutral Archive (VNA)** module lets you modernize at your own pace, connecting legacy PACS, preserving prior investments, and enabling phased migrations without disruption.
- **RUBEE® Orchestrator** supports enterprise-wide efficiency by intelligently routing the right case, to the right expert, at the right time, across the imaging care continuum.
- **Embedded AI** and specialty-specific tools seamlessly integrate into each clinician's natural workflow—enhancing precision, accelerating reads, and supporting confident decisions across the enterprise.
- **At its core**, the platform delivers a longitudinal, unified imaging view of each patient, so that every clinician sees the complete picture at every point of care.
- **Built for interoperability**, the platform connects seamlessly with EHRs and specialty systems—embedding tools directly into clinician workflows for a truly converged backend that minimizes infrastructure, simplifies rollouts, and eliminates overly redundant point solutions.

Your Imaging Health Network™ Starts Here.

AGFA HealthCare's Enterprise Imaging platform unifies imaging across your enterprise—breaking down silos, accelerating collaboration, and empowering clinicians to make confident, informed diagnoses at every point of care. By removing distractions and letting productivity flow naturally, your teams can focus, collaborate, and innovate like never before.

Anytime, Anywhere. Every Case.

Our Streaming Client delivers blazing-fast, browser-based access to diagnostic-quality* images from anywhere. Care teams have the flexibility to stay connected in real-time, and IT teams benefit from reduced infrastructure demands and elimination of costly client management, installations, and downloads. Securely access full-fidelity imaging from anywhere, even outside your network.

Intelligence That Accelerates

With RUBEE® AI, embedded AI tools accelerate reads, flag critical findings, and triage what's important—right within your workflow. Speed meets confidence. Integrated seamlessly with your existing systems, AI supports faster reads, prioritizes efficiently, and helps you focus on the most complex cases. The result: more confidence in every diagnosis.

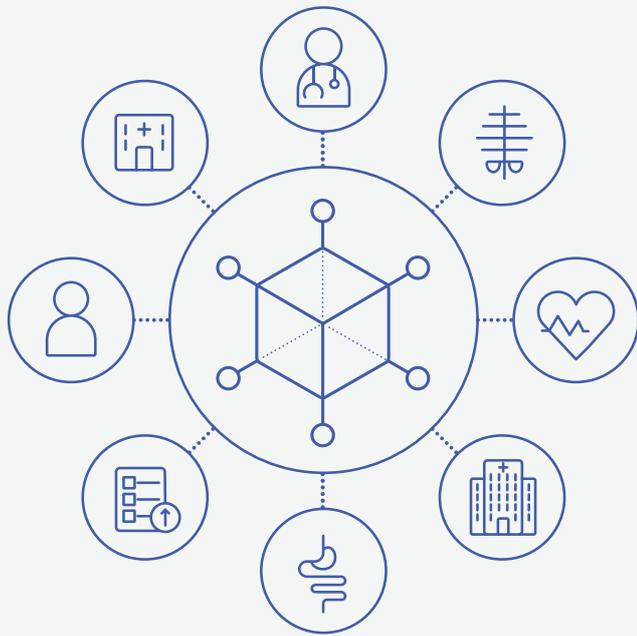

Built to Scale With You

Start with one or more service lines and grow with confidence. The Enterprise Imaging platform scales across departments, sites, and specialties while preserving a consistent user experience and architecture. Whether deployed in the cloud, on premises, or in a hybrid model, the platform adapts to your pace and strategy—without compromise.

* Actual image quality may vary depending on monitor specifications and archived resolution.

Who We Serve

Health Networks & Integrated Delivery Networks (IDNs)

Seamlessly integrate M&A and affiliates—without disruptive migrations. Transform fractured systems into one connected enterprise.

Academic Medical Centers

From education to diagnostics to integration, the platform adapts seamlessly, empowers decision-making, and connects effortlessly.

Community Hospitals

Eliminate silos while keeping operational flexibility with a modular, comprehensive platform.

Military & Government

Enable secure, global access to patient images across diverse care settings—from local hospitals to state, federal, and military health systems including the U.S. Defense Health Agency and the U.S. Department of Veterans Affairs.

Empower your clinicians without exhausting your team.

Decades ago, AGFA HealthCare set the standard for PACS solutions. Today we're redefining the future with the industry-leading Enterprise Imaging platform.

- Converged, vendor-neutral, helps protect existing investments
- One platform, unified workflows
- Frictionless migrations, no vendor lock-in
- On-premises, cloud, or hybrid—your pace, your rules
- One architecture supporting all specialties

Pioneer and Proven Market Leader

Enterprise Imaging Pioneer

AGFA HealthCare didn't just follow the market—we invented converged Enterprise Imaging. Today, we continue to lead with platform and clinical innovation, drawing on our broad experience and expertise in healthcare.

True Vendor Neutrality

Our VNA is the backbone of the EI platform, unifying imaging across departments and systems to provide enterprise-wide access to the complete imaging record. It safeguards your legacy PACS and departmental integrations while enabling a single, scalable platform, for today, and tomorrow.

Modular Without Disruption

Begin with core components such as storage or viewing and expand at your pace to full diagnostics across specialties. Our modular architecture supports phased adoption by department, volume, or workflow. With industry-leading Radiology and Cardiology modules, you get best-of-breed capabilities within a single, connected platform.

Integration in Our DNA

Integration is not an add-on—it's who we are. Our platform connects seamlessly with leading EHR systems like Epic, as well as the specialty systems and tools clinicians rely on. By embedding these tools directly into their workflows, AGFA HealthCare sets the standard for true interoperability, a challenge for many others in the industry.

Services To Ensure Satisfaction

Enterprise Imaging is more than technology; it's a clinical journey. With over 30 years of imaging expertise, your success is at the center of everything we do. That's why we provide dedicated customer success experts (not salespeople), to guide you at every step. From implementation and adoption to long-term optimization, we deliver a connected partnership that helps your teams stay in flow—and continue to grow.

Your Strategic Partner Through Every Phase

What drives us is your success. What keeps us awake is supporting your goals to achieve the best possible outcomes—for your organization, your clinicians, and your patients. With over 30 years of healthcare imaging expertise, AGFA supports you from deployment to your continuous growth.

Discovery & Planning

Our experts evaluate your workflows, systems, and goals to design a tailored roadmap that maximizes impact.

Migration Excellence

Seamlessly move your imaging data with precision and speed—supporting security, continuity, and minimal disruption.

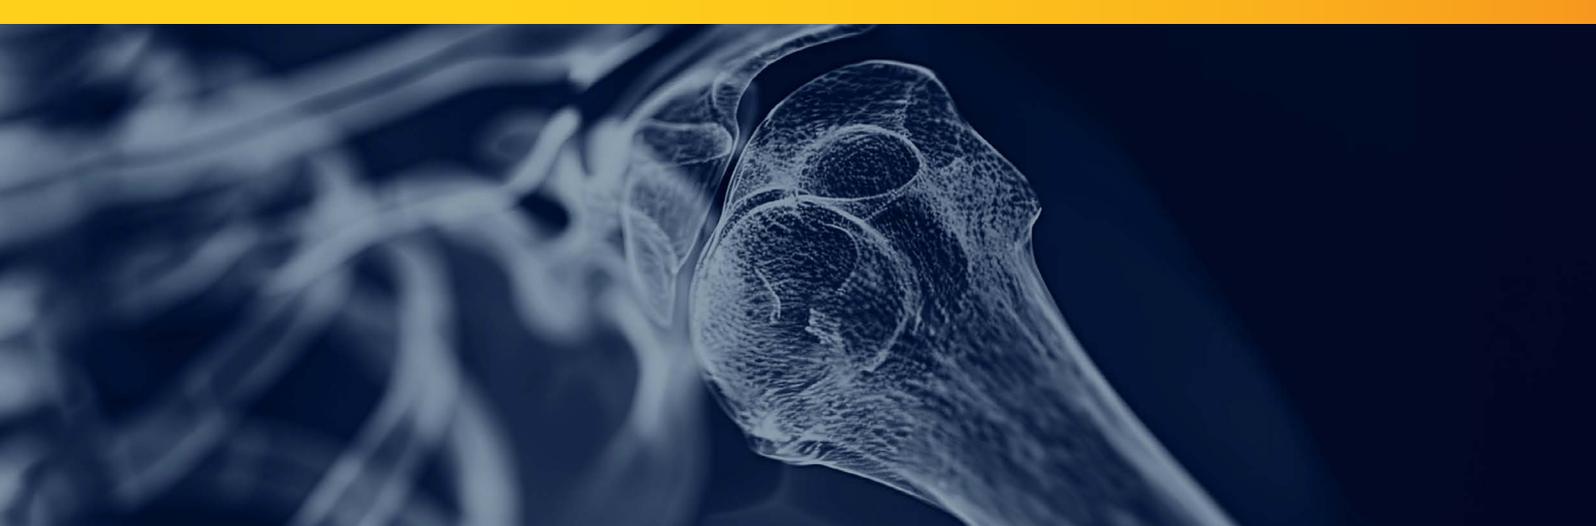

Clinical Integration

Effortlessly connects with Epic, Cerner, MEDITECH, and other systems to streamline workflows, enhance collaboration, and optimize patient care.

Training & Adoption

Hands-on, role-specific training accelerates team proficiency, drives adoption, and unlocks the full potential of your platform.

At every stage, AGFA is more than a vendor—we are your strategic partner, committed to delivering outcomes that matter.

MODULARITY FOR EVERY ORGANIZATION:

Embracing an Enterprise Approach to Imaging

No two healthcare organizations take the same path to Enterprise Imaging. That's why AGFA HealthCare's platform is modular by design—so you can start where you are and expand at your own pace.

Vendor-Neutral VNA

Unify imaging across your enterprise and safeguards your legacy PACS and departmental integrations, while enabling a single, scalable platform for today and the future.

Truly Universal Viewer

A single, Best in KLAS® 2025 viewing experience that unites images across all specialties and care settings—anytime, anywhere.

Radiology Foundation

Begin with a proven diagnostic backbone that streamlines radiology workflows, improves turnaround times, and scales as demand grows. Our solution supports both in-house providers and independent radiology practices, delivering flexibility and performance across diverse care settings.

A Unified Cardiology Ecosystem

Enterprise Imaging for Cardiology brings together all your cardiac imaging in one consolidated platform. From web-based image viewing and advanced analytics to structured reporting and flexible workflows, it streamlines the cardiologist's day, improves collaboration, and ultimately supports efficient delivery of patient care.

More Specialties on the Go

Easily add pathology,* molecular imaging, point of care ultrasound and other clinical specialties. With our modular approach, each specialty plugs into the same platform, delivering a unified view of the patient across your network.

With AGFA HealthCare, you choose your entry point and scale confidently, without disruption—building your Imaging Health Network,™ step by step.

* AGFA HealthCare Enterprise Imaging for Pathology is not available in all markets. Regulatory status may vary by country. It's not cleared for primary diagnostic use in the US.

Flexible Entry Points for Every Organization Stepping into Cloud

Enterprise Imaging

Start with universal diagnostic reporting enhanced by embedded AI and collaboration. Expand into workflow orchestration and cross-enterprise integration, delivering multi-site operations with intelligent case routing. Ultimately, unlock the full platform with advanced analytics and business intelligence.

VNA

Centralize archiving with smart lifecycle management to store your images vendor-neutrally. Then bring diagnostic capabilities and workflow orchestration online.

Cloud Storage

Transition your on-premise Enterprise Imaging by replacing aging storage with managed cloud solutions to cut infrastructure planning and upfront costs—then scale to full Enterprise Imaging at your own pace.

Delivery Models That Match Your Strategy

Cloud & SaaS – Fast deployment, predictable operating expenses, unlimited scalability; fully managed, no infrastructure headaches.

On-Premises – Leverage your current infrastructure while expanding modularly to meet growing needs. Our approach also paves the way to hybrid or cloud solutions whenever your organization is ready.

Hybrid – Deploy cloud components at your pace, combining cloud and on-premises as your strategy evolves.

👍👍 The benefits of Enterprise Imaging are not just felt by the radiologists. Enterprise Imaging also makes tasks easier and faster for our X-ray supervisors, improving our departmental efficiency. They can spend more time with patients: both enhancing patient contact and increasing the number of patients they can see.”

Amy Chown

Administrative Director of Radiology
University of Michigan Health-Sparrow

Supporting Your Success

Secure Support 24/7/365

Clinical imaging and technical expertise available 24/7/365, backed by HITRUST certification, Censinet-recognized cybersecurity transparency, and industry-leading compliances—delivering resilience and peace of mind you can trust.

Cloud-Native Architecture

A future-ready, cloud-native foundation designed to support your way—whether you deploy on-premises, hybrid, or full cloud.

Scaling, Made Simple

Seamless growth support for new specialties, acquisitions, or rising volumes—plus expert guidance available at every stage.

Innovation, Delivered

Continuous updates, AI tools, and emerging capabilities—AGFA stays focused on providing the features that serve modern practice of care.

Managed Services, Your Way

From on-premises to hybrid to full cloud, our managed services keep your environment optimized while reducing IT burden.

Cloud as You Transform

Move at your own pace with flexible options—from a single workload to a full Enterprise Imaging Cloud. Always powered by the same trusted platform foundation.

When technology
melts away and
the picture couldn't
be any clearer.

That's life in **flow**.
