

Imaging Made Easy.  
Cloud-Delivered, AGFA-Managed.

That's life in **flow**.

## AGFA HealthCare's Enterprise Imaging Cloud

Powered by AWS—unites infrastructure, solutions, services, delivery and business models. With built-in scalability, enterprise-grade security, and fully managed services, you can grow confidently while keeping the focus on patients and clinical excellence.

SEE A YEAR IN ACTION: TOOLS THAT HELP YOUR TEAM WORK FASTER, SMARTER, AND TOGETHER.

# Scale with Confidence, Work with Ease

Whether you're preparing for tomorrow or expanding across your health system today, our Enterprise Imaging Cloud keeps workflows efficient and growth manageable. Scaling never means slowing down.

January

May

September

All Year Long

## Scale easily after a new acquisition.

The new year brings growth. In the past, you would scramble for storage and server capacity. With the cloud, you scale on demand. Your new facility is integrated into your Enterprise Imaging environment smoothly and efficiently.

## Upgrades happen seamlessly.

No weekend downtimes, no upgrade marathons. With SaaS, updates are included. Your clinicians gain from always having the latest functionality, while your IT team can focus on advancing innovation, strengthening cybersecurity, and improving clinical user experience.

## No hardware refresh to plan.

Instead of budgeting costly hardware expansions or refreshes, your infrastructure is already covered. The cloud delivers what you need, when you need it—scalable and fully managed.

## More time for strategy.

With managed services handling system monitoring, patching, and routine work, your IT team can concentrate on driving business innovation and enabling clinical transformation.

# Trusted for 30+ Years. Delivering What's Next.

With Enterprise Imaging Cloud, AGFA HealthCare enables care providers to handle challenges related to the increasing complexity of healthcare operations with confidence. By choosing AGFA's fully managed Enterprise Imaging service, you shift operational complexity off your shoulders—so you can stay focused on care.

- **Experience robust uptime** with AWS well-architected certification—minimum 99.99% availability.
- **Offload data security responsibilities** for the IT infrastructure to dedicated AWS and AGFA security experts.
- **Scale effortlessly with cloud-native technologies** that grow with your organization.
- **Enhance care team synergies** with AGFA's Streaming Client, giving diagnosticians the flexibility to access, stream, and analyze images in real time.
- **Provide predictable costs** with AGFA's Cloud SaaS business model of managing IT cloud infrastructure and keeping your AGFA system up to date.
- **Unlock intelligent growth** at scale with RUBEE® Orchestrator, bringing federated worklists and orchestrated tasks to every phase of your expansion.
- **Grow at your own pace.** At AGFA, we recognize there's never just one way forward. Our flexible approach lets you scale up step by step, aligned with your time and budget—avoiding disruptive rip-and-replace projects.
- **Reduce IT complexity** and integrate seamlessly into your existing ecosystem with Enterprise Imaging.

👍👍 **AGFA HealthCare's solution really led from the front, and the digital ecosystem they brought together will deliver the experience, knowledge and innovation needed to create a complete cloud-based solution which covers the entire end-to-end patient pathway."**

**Pete Winchester**

Managing Director, Alliance Medical, UK

# Care Without Boundaries, Powered by Cloud

Around the globe, health systems are adopting unified cloud imaging to drive efficiency, scalability, and clinical collaboration. Backed by over three decades of healthcare imaging leadership, AGFA HealthCare's Enterprise Imaging Cloud provides a strategic foundation for your digital future. From growth through consolidation to teleradiology and outsourced reading, our solutions simplify operations, connect teams, and clear space for what truly matters—patient care.

## Health Networks & Large Health Systems

Grow your imaging across the organization with efficient workflow management, central administration, and predictive, transparent pricing to support growth through mergers and acquisitions.

## Academic Medical Centers

Advance research, teaching, and clinical excellence with unlimited licenses, specialized imaging tools, and easy integration with existing systems.

## Large Community Hospitals

Leave the infrastructure to us. Our managed services reduce complexity, so your team can focus on delivering high-quality care to your community.

## Teleradiology

Enable seamless remote and outsourced reading from any imaging source without rerouting or switching systems.

## Flexible Entry Points for Every Organization Stepping into Cloud

### Enterprise Imaging

Start with universal diagnostic reporting enhanced by embedded AI and collaboration. Expand into workflow orchestration and cross-enterprise integration, delivering multi-site operations with intelligent case routing. Ultimately, unlock the full platform with advanced analytics and business intelligence.

### VNA

Centralize archiving with smart lifecycle management to store your images vendor-neutrally. Then bring diagnostic capabilities and workflow orchestration online.

### Cloud Storage

Transition your on-premises Enterprise Imaging by replacing aging storage with managed cloud solutions to cut infrastructure planning and upfront costs—then scale to full Enterprise Imaging at your own pace.

“During our rollout, which is much faster than the industry standard, AGFA has done a phenomenal job of keeping up with our required pace.”

**Matthew Butler**

Assistant Director for Enterprise Imaging  
Tampa General Hospital

## Powering Healthcare Innovation Through Cloud Technology

Our cloud platform takes the hassle out of managing on-premises imaging systems across multiple locations, while providing powerful features that scale with your network.

- **Built for Healthcare:** Purpose-built for medical imaging, with intelligent workflow tools engineered to maximize the full capabilities of the Cloud.
- **Supported by AWS Well-Architected Infrastructure:** Certified for healthcare with strong data security and compliance.
- **Works with Your EHR:** Easily connects with Epic, Cerner, and MEDITECH and several others through Imaging Health Record™.
- **Smart Storage:** Intelligently manages image placement to meet healthcare needs and regulations.
- **Blazing Fast Image Streaming:** Quickly delivers images for specialists to review and diagnose.
- **Secure Network Connections:** Safely links multiple sites, supporting complex health systems and affiliates.

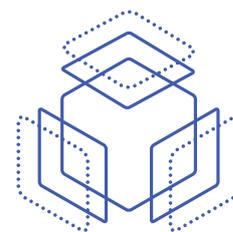

---

## Enable Growth While Reducing Risk

- **Unlimited Licensing:** No fees per user and no limits on the number of users. For healthcare systems of all sizes.
- **Clear, Predictable Costs:** No surprise fees or hidden charges.
- **Reliable Performance:** Built-in back-up support for any healthcare emergency, so care never pauses.
- **Automatic Updates:** Managed software updates, as soon as they are available.
- **Managed Security:** Hybrid or fully-cloud solutions with expert-managed security (see Security brochure).
- **Flexible Growth:** Whether you need storage, archiving, or diagnostics tools, Enterprise Imaging Cloud grows with your organization on your schedule and within your budget.
- **Seamless Journey:** Expert guidance and smooth workflows keep radiologists connected, IT teams confident, and imaging flowing—no matter where you start your journey.

# From Planning to Performance

From day one through planning, go-live, and beyond, AGFA HealthCare stays with you as you grow.

## Growth Enabling Technologies and Features

- **RUBEE Inside:** AGFA's rule-based enterprise workflow engine simplifies and optimizes workflow complexities.
- **Cross-Enterprise Worklist:** with RUBEE® Orchestrator: Simplifies the path to growth through acquisition or leverage diagnosticians outside your healthcare enterprise.
- **Cloud-Native Technology:** Build and run applications that dynamically adapt to demand-maximizing performance, efficiency, and the full benefits of cloud-based services and delivery models.
- **Streaming Technology:** Delivers diagnostic-quality\* imaging at streaming speed through a true web-based Cloud architecture.
- **FHIRCast Integrations:** Integrates your IT ecosystem seamlessly.
- **Native Advanced Information Lifecycle Management (ILM):** Maximizes the efficiency of Cloud storage.

## Migration & Implementation Excellence

- **Expert Data Migration:** Proven experience moving imaging data across sites and complex, multi-vendor systems.
- **Clinical Workflow Optimization:** Implementation designed for healthcare that keeps clinical operations running smoothly.
- **Flexible Migration Strategies:** Your choice—migrate all at once or in stages.

## Ongoing Healthcare Services

- **Always-On AGFA Support:** 24/7 access to AGFA clinical imaging experts.
- **Workflow Optimization:** Ongoing reviews and expert recommendations.
- **Training & Adoption:** Comprehensive training for healthcare professionals.

\* Actual image quality may vary depending on monitor specifications and archived resolution.

# Your Entry Point to a Unified, Cloud-Enabled Enterprise Imaging Platform

Healthcare organizations around the globe are investing in unified imaging platforms that connect specialties, sites, and systems—all within a single ecosystem. AGFA HealthCare's Enterprise Imaging Platform is your entry point to that future. Designed for scale, speed, and simplicity, it gives you fast, secure access to imaging across your enterprise, wherever care happens.

## **Anytime, Anywhere.**

The Streaming Client enables blazing-fast, flexible access to the full diagnostic toolset, truly delivered through a web-based Cloud architecture optimized for diagnostic performance. Care teams stay connected with fast, secure image access, while IT eliminates infrastructure burdens, client maintenance, and version management.

## **Work in Flow.**

With our RUBEE® Orchestrator, studies are intelligently assigned based on clinician expertise and availability—and critical findings are automatically escalated. This seamless, personalized worklist keeps clinicians in the zone, assigns cases in a fair and equitable manner, so they can perform at the top of their craft.

## **Tailored to you.**

Our imaging workspace features the specialty-specific tools you rely on most, from advanced visualization to precision measurement, embedded AI, and collaboration tools that seamlessly connect with specialists.

It's not just how fast  
an image loads.  
It's how quickly you  
can work with it.

That's life in **flow**.

## Experience Healthcare- Optimized Cloud Imaging

Discover how Enterprise Imaging Cloud transforms healthcare operations with a live, personalized demonstration tailored to your specific healthcare delivery model.

- **Strategic Overview:** Learn how our native cloud architecture supports clinical excellence and operational efficiency across your health system.
- **Implementation Deep Dive:** Explore our proven migration methods, clinical integration, and full support services.
- **Segment-Specific Planning:** Review flexible service packages and licensing models designed to fit your healthcare needs.

Let's transform imaging together, in the cloud, with confidence.
